To Whom It May Concern:

It is with great pleasure that I write this letter of recommendation for Scala Construction. Shortly after purchasing my home, I hired them as general contractor to oversee what evolved into a much larger project than originally planned.

Despite many unforeseen issues caused by previous work on the house, they rose to the challenge and were diligent about keeping me in the loop and collaborating with me and my staff to get the job done. They are very proactive and were genuinely concerned about the end result and ensuring my happiness. Under a tight deadline, they committed to getting me moved in before last 4th of July, and I was able to hold my first party! After moving in, they have assisted with various maintenance projects. No matter how small the task or when issues arise, they are prompt to respond and always make themselves available to assist.

Scala is an awesome team that takes great care to ensure a very high level of craftsmanship from everyone that worked on the project from their in-house team to the subcontractors, and the end result speaks for itself. I am happy to provide this referral and can highly recommend this team for any project. I know I will be using them again!

Sincerely,

A handwritten signature in black ink, appearing to read "Philip Lawrence".
